A nasscom initiative

ARE YOU A SUBJECT MATTER EXPERT?

Come and be part of a movement to reskill India's IT workforce on FutureSkills.

nasscom FutureSkills is an industry driven learning ecosystem to get India accelerated on the journey to become the global hub for talent in the emerging technologies.

Powered by 

From Creation to Curation

As the need to create technology based applications is constantly on the rise, from cars that can drive themselves to robots that identify dangerous skin cancers to immersive media that has transformed how we experience content, building and strengthening a source of learning content for IT professionals has become an imperative today.

Though there is an abundance of content available on any topic on the internet, weaving relevant content into a meaningful learning pathway to facilitate the learning of an individual to pick up a new skill is a challenge. As new learning models are evolving that are social and collaborative in nature, content curation by Subject Matter Experts is the next big thing!

Why become a Subject Matter Expert (SME)?

Be recognized as an expert and share your knowledge with a community of learners.

As you find meaningful content, curate it into a unique learning pathway using simple tools.

Show-off your expertise and see how the world responds.

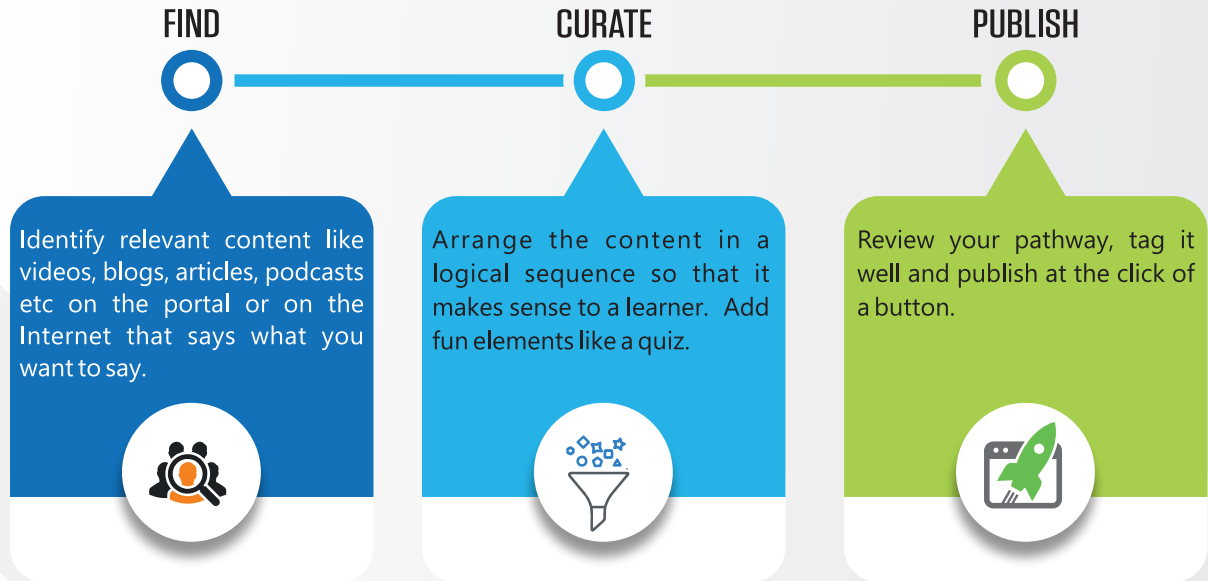

Network with your peer group - online and offline.

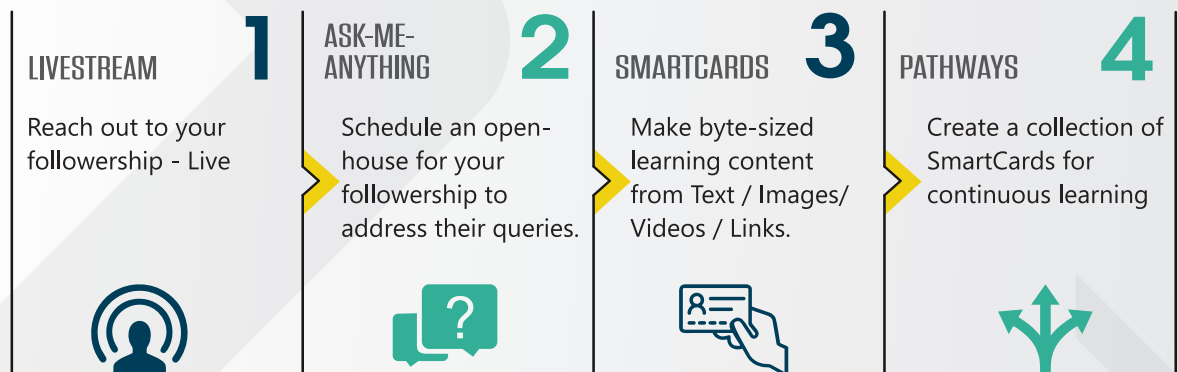

Drive, Inspire, Motivate & Influence Skilling for the workforce of the IT/ITeS Industry.

How can you contribute as an SME on The FutureSkills Portal?

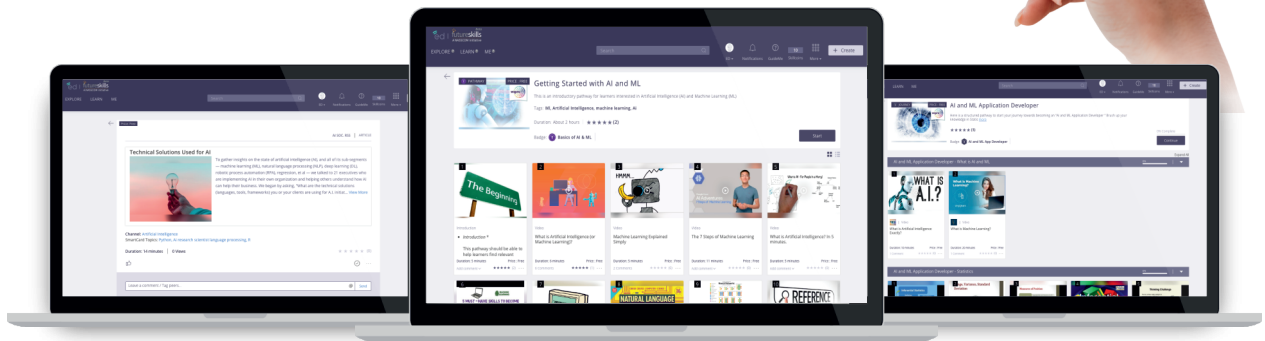

What do you contribute as an SME on the FutureSkills Portal?

- 3D Printing
- Artificial Intelligence

- Internet of Things
- Mobile Tech
- Robotic Process Automation
- Virtual Reality

Showcase yourself on FutureSkills

This could be you
Get discovered by 100,000+ users for your contribution to India's
largest learning ecosystem

Here's what you can do, just spending two hours a week:

Train the AI Engine

- » Help the AI Engine identify content sources, keywords, related topics and leaders in the area of interest.
- » Train the AI engine to learn what is relevant and what is not, till it does the job on its own.

Curate Smartcard

- » Make a habit of uploading relevant material as you come across it so that there is always something new to see.

Curate Pathway

- » Arrange your content in a logical sequence so that new learners can follow it step-by-step.
